

## Review Form 1.7

|                          |  |
|--------------------------|--|
| Journal Name:            | <b>Journal of Experimental Agriculture International</b>   |
| Manuscript Number:       | <b>Ms_JEAI_96939</b>   |
| Title of the Manuscript: | <b>Using Inpyrfluxam to Control Peanut (<i>Arachis hypogaea</i> L.) Foliar and Soil-Borne Diseases</b> |
| Type of the Article      | <b>Original Research Article</b>   |

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljeai.com/index.php/JEAI/editorial-policy> )

### PART 1: Review Comments

|   | Reviewer's comment  | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|---|---|---|
| <b>Compulsory</b> REVISION comments<br><br><b>1. Is the manuscript important for scientific community?</b><br>(Please write few sentences on this manuscript)<br><br><b>2. Is the title of the article suitable?</b><br>(If not please suggest an alternative title)<br><br><b>3. Is the abstract of the article comprehensive?</b><br><br><b>4. Are subsections and structure of the manuscript appropriate?</b><br><br><b>5. Do you think the manuscript is scientifically correct?</b><br><br><b>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b><br><b>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</b> | <b>1. Yes, as peanut grown in the southwest US are susceptible to numerous foliar and soilborne diseases. Moreover, information regarding the performance of inpyrfluxam in a peanut fungicide program for disease control in the southwestern US has been lacking. So, the results obtained provide a basis of comparison of inpyrfluxam in various fungicide programs to other fungicides commonly used in this region. Inpyrfluxam can also be an important tool for fungicide resistance management.</b><br><b>2. Change the title to:</b><br><b>Field studies to control peanut (<i>Arachis hypogaea</i> L.) foliar and soil-borne fungal diseases using Inpyrfluxam</b><br><b>3. Yes.</b><br><b>4. Yes.</b><br><b>5. Yes.</b><br><b>6. The references are sufficient; however, those of the last 5 years are lacking.</b><br><br><b>The paper is applied, as it helps in controlling fungal diseases of peanut.</b> |   |
| <b>Minor</b> REVISION comments<br><b>1. Is language/English quality of the article suitable for scholarly communications?</b>   | Yes.  |   |
| <b>Optional/General</b> comments  |   |   |

### PART 2:

|   | Reviewer's comment   | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|---|--|---|
| <b>Are there ethical issues in this manuscript?</b> | <i>(If yes, Kindly please write down the ethical issues here in details)</i> |   |
