

## Review Form 1.7

Journal Name:	<b>Journal of Geography, Environment and Earth Science International</b>
Manuscript Number:	<b>Ms_JGEESI_97605</b>
Title of the Manuscript:	<b>Application of Geoelectric technique in groundwater protection of Quaternary aquifer in Wadi El Natrun, Egypt</b>
Type of the Article	<b>Original Research Article</b>

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljgeesi.com/index.php/JGEESI/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory REVISION</b> comments <b>1. Is the manuscript important for scientific community?</b> (Please write few sentences on this manuscript)  <b>2. Is the title of the article suitable?</b> (If not please suggest an alternative title)  <b>3. Is the abstract of the article comprehensive?</b>  <b>4. Are subsections and structure of the manuscript appropriate?</b>  <b>5. Do you think the manuscript is scientifically correct?</b>  <b>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b> <b>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</b>	The article presents all the scientific elements. The title is relevant. The summary is correct. The subsections are correct. The article is scientifically correct. The references are sufficient and important.  The manuscript presents technical results that were not discussed in conjunction with the problem.  Due to the extensive drilling of water wells in the area, significant hydrogeological and environmental problems have occurred, such as soil salinization, water column decline and deterioration of groundwater salinity. This result in the abstract is not presented in the results and discussions. I advise the authors to cross the technical data with the natural and anthropic problems of the region.	
<b>Minor REVISION</b> comments <b>1. Is language/English quality of the article suitable for scholarly communications?</b>	yes	
<b>Optional/General</b> comments		

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
