

## Review Form 1.7

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_97204
Title of the Manuscript:	Stabilization of a pickering emulsion by nanoparticles of Eudragit RSPO and polyepsilon caprolactone: Contact angle measurement and surface tension studies.
Type of the Article	Original Research Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalpri.com/index.php/JPRI/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u>	<p>The manuscript "JPRI_97204" deals with the stabilization of a pickering emulsion by nanoparticles of Eudragit RSPO and polyepsilon caprolactone: Contact angle measurement and surface tension studies. The topic is interesting and relevant, however major changes are needed to make this manuscript acceptable for publication in Journal of Pharmaceutical Research International.</p> <p>According to the authors, the aim of the work was the development of a preparation and study of pickering emulsions stabilised by a polymer such as poly epsilon caprolactone and eudragit RSPO. Since the Journal of Pharmaceutical Research International covers high quality papers, there are some important issues that need to be addressed:            1) The manuscript presents a satisfactory revision and discussion of the study aim. However, the text has many minor mistakes related to grammar (English errors) and formatting. A lot of minor mistakes become a big mistake. Even the manuscript title presents English mistake. Therefore, the authors should revise the English in entire manuscript.            2) The authors should develop Analysis of Variance in order to statistically certify the differences/equality among the results.</p>	
<b>Minor</b> REVISION comments 1. Is language/English quality of the article suitable for scholarly communications?		
<b>Optional/General</b> comments		

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
