

Review Form 1.7

Journal Name:	Journal of Scientific Research and Reports
Manuscript Number:	Ms_JSRR_96490
Title of the Manuscript:	Feasibility of cassava semolina (Attiéké) as a vehicle for food fortification: A survey in areas of Côte d'Ivoire with high levels of childhood micronutrient deficiencies
Type of the Article	Short Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1.The work is interesting, it solves a major problem in the department of Issia. The authors had the idea of using a food available all year round to treat malnutrition.</p> <p>2. The title is correct.</p> <p>3. Yes, the abstract is comprehensive.</p> <p>4.The subsections and structure of the manuscript are appropriate</p> <p>5. Yes.</p> <p>6. Yes, the references are sufficient and recent but: It is necessary to check the numbering of the references which is in duplicate. The names (genus and species) of the strains must be italicized. References 13-23, 25-30 replace the word french by France</p> <p>25. food capitalize the F The work is entitled "Feasibility of cassava semolina (Attiéké) as a vehicle for food fortification: A survey in areas of Côte d'Ivoire with high levels of childhood micronutrient deficiencies" This study was conducted from May 14 to 21, 2021 in an area of Côte d'Ivoire in elementary school of six villages (Béliéguhé, Zédéguhé, Béréguhé, Maboguhé, Dibléguhé and Guéguhé) where previously a high prevalence of childhood anemia was detected. To fight against malnutrition, the results of this study showed that cassava semolina, available on the market all year round, can be added to foods to enrich them in order to overcome nutritional deficits in children. I would have liked to have an idea of the biochemical composition of cassava semolina to better enrich the discussion. The last column of Table 2 needs to be reviewed: To my knowledge F is the Fischer test and p is the probability they must be mentioned below the table. p is greater than 0.05 so it is not significant. Figure 2 it is necessary to review the coefficient of determination R2 (here it is not significant it is very far from 1) I conclude that the work is worth publishing after correction.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	Can be improved	
Optional/General comments
