

Review Form 1.7

Journal Name:	Cardiology and Angiology: An International Journal
Manuscript Number:	Ms_CA_97264
Title of the Manuscript:	Prevalence and Predictors of Coronary Artery Ectasia among Delta Population
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1. Yes</p> <p>2. Yes , it worth to mention in the title (Nile Delta Population) or (delta population in Egypt).</p> <p>3. Yes</p> <p>4. yes</p> <p>5. Some notes are required to be checked</p> <p>6. Some of references are with period (2021-2018)</p> <p>Few notes are found in the manuscript required to be checked by the author:</p> <p>1- Its worth for the mainuscript to be reviewed by cardiologist.</p> <p>2- Abstract contains abbreviations without full words previous . e.g CRP, NLR, RCA. Some of the readers may have difficulties to understand abbreviated words.</p> <p>3- The references started in the introduction section from (1-5) . Methods section lack reference (6, 8 and 9) while references is added in discussion starts by no. 80 with superscripts (p11) . in general references required reorganization.</p> <p>4- discussion is advised to be checked due to bulky details in comparing between the current study and other studies.</p> <p>5- In the abstract and the methods the author stated that patients have been divided into two groups (Group1: CAE cases ; group 2 non-ectasia cases) and all the statistics have been done accordingly . But in P12 line 10 the author stated (We divided our cases into three groups based on their coronary artery disease status: CAE, Coronary artery stenosis and controls. Normal group (n = 744) CAS group (n = 1966) ectasia group (n = 85). The prevalence of CAE was 3.04%). This must be checked.</p> <p>6- In the discussion section the author have compared the present research with the results of other studies with adding explanation for the main finding for e.g CRP is one of the predictors of the diseases . While in conclusion stated (The existence of CAE can be predicted using easily accessible clinical laboratory values such as CRP, Neutrophil to lymphocyte ratio, mean platelet volume, and platelet to lymphocyte ratio, which means that CAE is also severe inflammatory process.) Its worth to add this statements with references that confirm them.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	Yes	
Optional/General comments		

Review Form 1.7

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
