(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>Yes</p> <p>Yes</p> <p>No</p> <p>Yes</p> <p>No</p> <p>No</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>No</p>	
<p>Optional/General comments</p>	<p>Comments to the Author The authors examine that Factors promoting Non-accessibility to Primary Health Care may I find this article to be generally well provide interesting information that will add to medical knowledge about primary health care in Kongo. There are major formatting and grammatical components that need adjustment and I have provided the following for consideration by the investigative team: Abstract: 1) The first sentence seems to not senseful as opening abstract 2) Method section is not comprehensive 3) The final sentence of the results needs a closing parenthesis says serious problem but the result doesn't show that Background 1) Most of paragraphs has no citation's , fragmented sentences are seen punctuations are not used properly Material and methods: 1) Study area is not where descried specially health programs and health institutions in DG of Congo not mentioned 2) What Authors want to say this sentences it is not clear for authors ""The Yelenge health area is one of the health areas that make up the Yakusu health zone. 3) Can the authors consider providing a definition to "health zone"? 4) Data analysis were not mention how authors measured association between predictors and outcome variables 5) The sampling procedure and sample size calculations seems very shallow Results 1) There are several pronouns and jangle sentences 2) Tables doesn't fulfill any research format 3) Authors should review the language 4) There is no any statical procedures that can show association between predictors and outcome variables</p>	

Review Form 1.7

	5) Tables and Figures: There is a lot of information provided by the investigative team. I might consider limiting the tables and figures to only the most important of the group that provide Conclusion 1) Not written based on major finding
