

Review Form 1.7

Journal Name:	International Blood Research & Reviews
Manuscript Number:	Ms_IBRR_97296
Title of the Manuscript:	CONVALESCENT PLASMA INFUSIONI IS NON EFFECTVE IN REDUCTION OF MORTALITY LATE IN ITALIAN HOSPITALIZED PATIENTS WITH SEVERE COVID-19 PNEUMONIA: A CASE-CONTROL PROSPECTIVE STUDY
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalibrr.com/index.php/IBRR/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1. In my opinion, the present manuscript is scientifically relevant given that theoretically the possibility of incorporating the treatment studied in the therapeutics of COVID-19 disease is possible, and would offer an alternative that could reduce mortality in stages with marked severity; however, to date, the information on its efficacy is still undeterminable, making more work necessary to address the field.</p> <p>2. The title complies with the established norms</p> <p>3. The abstract complies with the requirements of the standards and is comprehensible.</p> <p>4. The structure of the manuscript is partially as requested, it is recommended to follow the guidelines for the submission of original manuscripts in word format provided by the journal (font, font size, spacing, word length, etc.) (https://journalibrr.com/index.php/IBRR/about/submissions), as well as compliance with STROBE guidelines for case control studies (https://www.strobe-statement.org/).</p> <p>5. The manuscript has the approval of the ethics committee and declares the respective consents necessary for participation in the study so it is scientifically correct.</p> <p>6. The references are adequate, however, I suggest the revision and inclusion of the works of Focosi and Marconato with the purpose of deepening a little more in the therapy based on convalescent plasma, for which I attach the respective DOIs:</p> <ul style="list-style-type: none"> • 10.1172/jci158190 • https://doi.org/10.1128/cmr.00200-21 	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	Yes, the language/English quality of the article is correct	
<p>Optional/General comments</p>	<ul style="list-style-type: none"> • I recommend the correction of the pronoun "The" in the first paragraph of the introduction, the authors have typed "tha convalescent plasma". • I recommend in the keywords section the replacement of "Convalescent Plasma" by a valid MeSh term. 	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
