If you have suggestion of additional references, please mention in the review form.</b> <b>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</b>	Yes  Yes  Yes  Yes  Yes	
<b>Minor</b> REVISION comments 1. <b>Is language/English quality of the article suitable for scholarly communications?</b>	Yes	
<b>Optional/General</b> comments	This is a very important study.  Authors have very clearly identified the issues related to refusal of vaccination.  Since religious issues have been found to be commonest, among Muslim population, which should be handled in a planned and convincing way.  Although authors have tried that, but the methods which can be used to overcome these beliefs could be discussed a little bit more. You could mention the difference in this population from those Muslim populations/ countries having very high immunization coverage, to justify vaccination. You could also discuss how religious leaders could further contribute to spreading correct information.
