

Editor's Comment:

The manuscript entitled "Heavy Metal Contaminants In Popularly-Consumed Vegetables In Freetown, Sierra Leone" has been revised by the authors according to the reviewer's comments.

But, there are still grammatical errors in the manuscript and I advise that the whole manuscript should be checked by a native speaker to improve the language quality. Besides, the conclusion should be added, which is missing.

I inform you that the manuscript will be accepted for publication after completing my suggestions.
