This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

<https://www.journalijr2h.com/index.php/IJR2H/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. (Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)	Needs to be rewritten No, it is not. Leucocytosis is essentially a function of time No. It is not. The commonest abnormalities associated with leucocytosis are lactic acidosis and tumour lysis syndrome – uricemia, renal failure, hyperkalemia – these are not discussed Can be better organised No, it is not correct. There is no such pathological variant as hyperleucocytic leukemia. Must include references to lactic acidosis and tumour lysis syndrome	
Minor REVISION comments		
1. Is language/English quality of the article suitable for scholarly communications?	Needs major revision with regard to grammar, syntax, spelling and punctuation. The document must be edited by an English speaking person.	
Optional/General comments	The emphasis can be on complications listed above – lactic acidosis and tumour lysis syndrome and their impact on remission induction, bleeding, renal failure, need for dialysis and overall induction mortality	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
