

Editor's Comment:

1. Correct the phrase 'Regarding the forms of application to the soil of scarlet starglory (*Merremia aegyptia* L.) mixed with poultry manure (incorporated and cover) there was no statistical difference, with values of 12.6 and 14.6 cm plant⁻¹, respectively (Table 2).' As there WAS a significant difference.
2. Please add in the conclusion section that coverage resulted in better results than incorporation.

Based on that I am glad to suggest the acceptance of the manuscript.
