

Editor's Comment:

The revised manuscript has not fully responded to the comments of the reviewers. There are many major flaws in this revised manuscript. Therefore, the authors must correct the following items prior to be considered for publication acceptance:

1. Keyword selections are missing.
2. The practical implications derived from this study must be included in the abstract as well as in the conclusions.
3. The method section is too brief. More details are needed on the study methodology, such as the sample size, analytical tools, interview questions.
4. Use "and" instead of "&" throughout the entire text.
5. In Table 1, length unit "m" is used for capacity. Should it be volume instead?
6. In Table 2, what is the unit used for the "price"?
7. What is the purpose of the SWOT analysis? The SWOT table should have a table caption and be referred to in the text along with adequate discussions.
8. In the reference, all the authors' names must be listed out, not just "et al."
9. Many spacing and English errors have been detected. As such, a thorough proof-check and English check is highly recommended.
