**Review Form 1.7**

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Compulsory</b> REVISION comments</p> <ol style="list-style-type: none"> <li>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</li> <li>2. Is the title of the article suitable? (If not please suggest an alternative title)</li> <li>3. Is the abstract of the article comprehensive?</li> <li>4. Are subsections and structure of the manuscript appropriate?</li> <li>5. Do you think the manuscript is scientifically correct?</li> <li>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</li> </ol> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p><b>My comments:</b></p> <p>The article "A Study on Status of Micro Food Processing Enterprises in Andhra Pradesh" presents research on the food processing sector in the state of Andhra Pradesh, India. The aim of the study was to identify and understand the status of food processing enterprises in the state and categorize them into micro, small, medium, and large for better understanding.</p> <p>In terms of structure, the article follows a logical and well-defined organization, starting with a clear and concise introduction of the food processing sector in India, followed by a clear statement of the problem the study aims to solve. The methodology is clearly presented and well described, including the collection of secondary data from various government sources and the use of statistical methods to analyze the data. The results and discussions are presented in a clear and objective manner, including tables and graphs to present the findings. The conclusion is succinct and provides a summary of the key findings and their relevance to the food processing sector in Andhra Pradesh.</p> <p>Overall, the article seems to be well written and well organized. The methodology used is appropriate for the study's objective, and the results and discussions are presented in a clear and objective manner. However, it should be noted that the study relies mainly on secondary data collected from government sources, which may limit the accuracy and validity of the results. Additionally, it would be helpful to include a more in-depth discussion of the practical implications of the findings for policymakers and other stakeholders in the food processing sector in Andhra Pradesh.</p> <p>However, while the study provides useful information on the number and distribution of micro food processing enterprises in different categories and districts, there is limited analysis of the factors contributing to their success or failure. For example, it would be helpful to explore the challenges faced by these enterprises and the strategies they use to overcome them. The study concludes with a summary of the key findings, but there is limited discussion of the practical implications of these findings for policymakers and other stakeholders in the food processing sector in Andhra Pradesh. It would be helpful to provide more in-depth analysis and recommendations for how to promote the growth of micro food processing enterprises in the state. So, the study concludes with a summary of the key findings, but there is limited discussion of the practical implications of these findings for policymakers and other stakeholders in the food processing sector in Andhra Pradesh. It would be helpful to provide more in-depth analysis and recommendations for how to promote the growth of micro food processing enterprises in the state.</p> <p>It seems to me that just identifying the typology of companies by their 'size' characteristics is not enough. But overall, I approve of the article.</p>	
<p><b>Minor</b> REVISION comments</p> <ol style="list-style-type: none"> <li>1. Is language/English quality of the article suitable for scholarly communications?</li> </ol>		
<p><b>Optional/General</b> comments</p>		

**PART 2:**
