PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. (Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)	<p>Regarding the fact that there are less than 400 cases described in the literature, an overview on diagnosis and therapy of this rare trauma is interesting and helpful.</p> <p>The discussion on the management and the outcome of the different methods should be improved.</p> <p>Yes</p> <p>Yes</p> <p>Yes</p> <p>No. Rozzanigo et al., 2021; de Bruijn et al., 2018; Lopera et al., 2011</p>	
Minor REVISION comments 1. Is language/English quality of the article suitable for scholarly communications?	English writing should be improved considerably. A native speaker should assist.	
Optional/General comments	Figure 1 is not sufficient. A CT scan should show the occluded accessory renal artery, the main artery and the kidney. A coronal section would be helpful. The management in the present case and the reasons for it as well as the outcome should be reported in detail. In the discussion part, the management and the outcome of the different treatment methods should be discussed more intensively.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
