PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. (Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)	This manuscript can be helpful in specific cases but cannot be applied on a large population with morbidities. Title is suitable for the article. Abstract is of the article should focus on bilateral atherosclerosis and stent placement. Manuscript is appropriate. Scientifically the treatment options in chronic atherosclerotic patients should not be stenting directly and should be as assessed according to clinical patient signs and symptoms i.e Power % As it's a case report. References are enough. There should be stepwise scientific approach in investigations and treatment approaches for atherosclerosis mentioned in the body. In case of bilateral carotid stenosis bilateral stenting can be an option but not majority of cases.	
Minor REVISION comments 1. Is language/English quality of the article suitable for scholarly communications?	Minor grammatical changes are needed	
Optional/General comments	Generally an Average article can be published after few changes	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
