

Review Form 1.7

Journal Name:	Asian Journal of Research in Agriculture and Forestry
Manuscript Number:	Ms_AJRAF_99472
Title of the Manuscript:	The Impact of Decreasing Forest Areas on Increasing Global Temperatures and the Tourism Industry
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. (Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>This paper is paper is for high importance to the scientific community as it deals with a topical subject. The authors are trying to find the relationship between forest loss and Global warming, and tourism industry activities. It is known that Landuse/ cover changes that affect the global biosphere and climate. The novelty of this paper is in trying to measure that relationship using existing literatures. The authors added a new variable which is the tourism industry. However, some comments are added in the corrected manuscript.</p> <p>The title is clear. However, I may suggest: " The impact of Increasing Forest Loss Areas on the Global Temperature, and Tourism Industry".</p> <p>The abstract is comprehensive, only authors should include a general background and add key concrete values of findings. Yes, the subsections are appropriate. However, authors should add in the Discussion subsection their true findings and their explanations. In overall, the article is scientifically correct, but authors should use appropriate statistical tests to prove the relationship between variables. Some clear figures and tables have to be added. References are recent, but authors need to add more according to comments we suggested.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	Language is clear.	
<p>Optional/General comments</p>	<p>The work is overall good however some changes are needed :</p> <ol style="list-style-type: none"> INTRODUCTION : References should be added in texts, Authors are repeated the word "Research by", most of concerned paragraphs should be written with more proper style. METHODS : authors should use the past tense instead of future. In data analysis, a clear table summarising literatures used are important, authors, results should be added. RESULTS: Authors should use a statistical test (eg Pearson) to measure the relationship among variables. The test result will confirm the relationship among variables. 	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
