PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1. YES Household head age, tertiary education attainment, the value of assets owned, and access to land and credit are the primary factors that determine whether or not a household is vulnerable to nutritional deprivation. On the other hand, the primary factors that explain chronic nutritional vulnerability among rural households in Nigeria are access to credit, value of assets owned, amount spent on food, and tertiary education. Therefore, it is absolutely necessary for those who are nutritionally vulnerable to have access to support mechanisms such as programmes to increase access to nutritious food, credit, and land, as well as expanded education on nutrition</p> <p>2. YES The title of the article is appropriate for study design.</p> <p>3. YES Abstract of the article is more comprehensive by following all the principles</p> <p>4. YES Appropriately written.</p> <p>5. YES. Well organised. Well written. Ample tables showed scientifically appropriate</p> <p>6. YES. Sufficient and recent references are provided. As man's primary source of nutrients, food remains a basic and essential requirement for his survival and well-being. Diet and nutrition are necessary for good immunity and system function from conception to adulthood. The nutritional status of all individuals, regardless of age group, is thus an essential component of their mental and physical health and healthy growth. Support mechanisms such as initiatives to promote access to healthy food, credit, land, and education are critical. To successfully address the issues affecting the nutrition and health of persons facing vulnerabilities, social welfare programs with interventions based on the characteristics of each vulnerable group and the predisposing factors should be adopted.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>YES. Written in simple language. Easy to read and easy to understand. The article is very much suitable for scholarly communications.</p>	
<p>Optional/General comments</p>	<p>Well organised, well written manuscript. Major language errors and grammatical mistakes are not noticed. Manuscript is suitable for scholarly publications.</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes. Kindly please write down the ethical issues here in details)</i></p>
