

Editor's Comment:

The reported study is of obvious practical concern and is well conducted.

Those minor suggestions of Reviewers which look relevant to improve the manuscript have been fairly well accounted for by the Authors in the revised version.

Yet, for a better understanding by foreign readers, I just invite the Authors to complete the designation of the season "kharif" by precisising the corresponding period in months interval (from june to october, as far as I know)

Thus, in its revised form, this good paper deserves being published in IJECC.
