

Review Form 1.7

Journal Name:	Journal of Advances in Mathematics and Computer Science
Manuscript Number:	Ms_JAMCS_99620
Title of the Manuscript:	□ □ x □ □ 2 □ □ □ x □ 2 □ Research on Equation
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. (Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1- This paper is useful for the mathematical society.</p> <p>2- The title is suitable.</p> <p>3- The abstract is comprehensive.</p> <p>4- Subsections are ok.</p> <p>5- The results are correct.</p> <p>6- The references are not sufficient. Authors should better explain the advantages of the present methods over the other analytical methods. [1] Solving nonlinear fractional partial differential equations using the homotopy analysis method, Num. Meth. Partial Differential Eq J. 26 (2010) 448–479. [2] The solution of the linear fractional partial differential equations using the homotopy analysis method, Z. Naturforsch 65a (2010) 935–949. [3] Application of semi-analytic methods for the Fitzhugh-Nagumo equation, which models the transmission of nerve impulses, Math. Methods Appl. Sci. 33 (2010) 1384–1398.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>This paper should be polished in grammatical.</p>	
<p>Optional/General comments</p>		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
