

Review Form 1.7

Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_99283
Title of the Manuscript:	"Influence of organic manures and zinc on growth, yield and economics of Pearl millet (<i>Pennisetum glaucum</i> L.)"
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalijecc.com/index.php/IJECC/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. (Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)	1. Vermicomposting is the most promising organic fertilizer which not only increases plant growth and productivity by nutrient supply but is also cost-effective and pollution free. The use of vermicompost promotes soil aggregation and stabilizes soil structure. Vermicompost helps to create better environments, reducing ecological risk. The results clearly showed the influence of vermicompost on the growth components like significantly increased plant height, dry weight, ear head length, the maximum number of grains/ear head, grain weight/ear head, test weight, grain yield, stover yield, and harvest index. Moreover, the results significantly showed that treatment using vermicompost was a good source compared to normal soil treatment. 2. The title is appropriate 3. The abstract is comprehensive. 4. Yes 5. Yes 6. The references are sufficient and recent.	
Minor REVISION comments 1. Is language/English quality of the article suitable for scholarly communications?	Yes, minor grammatical mistakes need to be completed.	
Optional/General comments	Relevant and important research.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
