

Editor's Comment:

While the manuscript would be fine for publishing, I have the following comments to make on it

1. what problem the authors are trying to solve through this work is not clear. this requires an explanation
2. The work on moisture, fats, protein and carbohydrates has been done by others, what value does it add to repeat them in this work? it does not in my opinion. the work on mechanical properties has been done also by others, why is this work different? this requires to be clearly mentioned and the knowledge the work is generating or adding to literature on chicken meat cooking.
3. The conclusion on each of moisture, fats, etc. is the same (interaction of variables, -----). this is monotonous and does not add anything to the conclusions).
4. The main conclusion is a repetition of what has been said in the body of the report, what is new? what has been solved by this work? As it is, the authors are required to rework the text.
