

Review Form 1.7

Journal Name:	Microbiology Research Journal International
Manuscript Number:	Ms_MRJI_100004
Title of the Manuscript:	A rapid method to screen for Multi Drug Resistance (MDR) trait in clinical isolates of Acinetobacter baumannii-Acyl Homoserine Lactone (AHL) screening in CRAB and CSAB isolates.
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> Is the manuscript important for scientific community? (Please write few sentences on this manuscript) Is the title of the article suitable? (If not please suggest an alternative title) Is the abstract of the article comprehensive? Are subsections and structure of the manuscript appropriate? Do you think the manuscript is scientifically correct? Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<ol style="list-style-type: none"> This manuscript is very important for the scientific community. Indeed, it makes it possible to shorten the time of diagnosis in sceening a multi drug resistance (MDR) trait in clinical isolates of <i>Acinetobacter baumannii</i> . The title of this article is suitable. The abstract of this article is comprehensive. But authors must give the meaning of abbreviations as soon as they appear in the texte from the abstract. Which is not the case for AHLs, MDR, CRAB et CSAB. Yes, the subsections and structure of the manuscript are appropriate. Yes. I think that this manuscript is scientifically correct. <p>Yes the references are sufficient and recent.</p>	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> Is language/English quality of the article suitable for scholarly communications? 	Yes the language/English quality of the article need to be improved	
<p>Optional/General comments</p>	<p>This is a manuscript concerning an important current topic and innovation in the diagnosis of Multi Drug Resistant bacteria.</p> <p>Follow journal guidelines</p>
