PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p> | <p>Dear author Interesting report but still need more revision. My comments are below:</p> <p>General:</p> <ul style="list-style-type: none"> - There are a lot of punctuation and typographical errors throughout the manuscript and the manuscript needs English editing. - Please revise your abstract and case report sections as recommended in SCARE Guidelines (completed SCARE checklist). <p>Abstract:</p> <ul style="list-style-type: none"> - You should briefly mention the patients' main findings, diagnosis, treatments, and follow-up. - Please mention your conclusion. <p>Keywords:</p> <ul style="list-style-type: none"> - Please add "case report" in your keywords. <p>Introduction:</p> <ul style="list-style-type: none"> - The first sentence should be deleted. Please revise this section to include the rarity and aim of reporting your case. - Please avoid multiple references citation. - The introduction section should end with a sentence summarizing the case and serving as a transition to the next section, such as "We report two cases of..." <p>Case presentation:</p> <ul style="list-style-type: none"> - The current unstructured presentation is not acceptable. All the following subheadings should appear in this section, unless not applicable: Patient Information, Clinical Findings, Timeline of current episode, Diagnostic assessment, Diagnosis, Therapeutic interventions, Follow-up, and outcome of interventions. Please revise this section for each case. <p>Case 1</p> <ul style="list-style-type: none"> - Please report each case separately. - Please reported the important associated symptoms. - Please report the past medical, surgical, and family history. - Please report the important PE findings such as temperature, tenderness, rigidity, etc... - Please report the important lab findings; mentioning only a leukocytosis is not acceptable. - The radiologic findings of acute appendicitis should be rewritten as a radiologic term. - "In the year 1995-1997, that was the era of open surgery, no laparoscopic surgery was started." Delete this sentence as it does not make any sense. - Please mention the postoperative course, pathologic result, and follow-up. <p>Case 2</p> <ul style="list-style-type: none"> - Please mention a previous recommendation in case 1 for this case. <p>Discussion:</p> | |

| | <ul style="list-style-type: none"> - The current discussion is not accepted. Please discuss factor by factor. - For individual cases, it is advisable to describe how the case is rare/unusual and the educational/scientific merit of its publication, followed by an overview of the topic and a comparison of your case with similar cases described in the literature. <p>Conclusion</p> <ul style="list-style-type: none"> - Please revise this section as below: a) It should be in ONE paragraph b) It should provide a one-sentence summary of your case c) It should provide a take-home message. What can we learn from this case? d) It should not contain a very general statement that is not strictly related to your case. <p>References</p> <ul style="list-style-type: none"> - Please cite recent papers such as https://doi.org/10.1186/s12917-020-02631-w - The reference style should be adopted with the journal style. Please see the authors' guidelines. - Journal names should be abbreviated as per the Journals Database section in PubMed (http://www.ncbi.nlm.nih.gov/nlmcatalog/journals). <p>Figures ligand:</p> <ul style="list-style-type: none"> - Please add a figure ligand. | |
| Minor REVISION comments | | |
| 1. Is language/English quality of the article suitable for scholarly communications? | <ul style="list-style-type: none"> - There are a lot of punctuation and typographical errors throughout the manuscript and the manuscript needs English editing. | |
| Optional/General comments | | |
