

Editor's Comment:

I give my opinion regarding the work JERR 100412, with original title "The use of AI for real-time energy management in buildings: An analysis of how AI can be used to optimize energy consumption in buildings through real-time energy management", and later changed in the second version to "The use of AI for real-time energy management in buildings: An overview".

I think the authors have satisfactorily taken into account the referees' remarks.

Therefore, the article can be published, changing before the referencing system to the one used by the JERR journal.
