<b>Minor</b> REVISION comments	Based on the results of three-year experimentation it may be concluded that capsicum gave maximum average fruit weight (86.77 g), average fruit length (25.91) and yield (558.24 q/ha) in red color shade net which is significantly higher over green, white and black colored net. Whereas in shading intensity the maximum average fruit weight (87.14 g), average fruit length (26.15) and yield (542.44 q/ha) recorded with 50 percent of shading intensity which is significantly higher over 35 and 75 percent shading intensity in the article.	
<b>Optional/General</b> comments	In fact, there are many different types of bulgur. The accuracy of the information provided is very accurate. I've done a lot of work on this as well.
