

Review Form 1.7

Journal Name:	Asian Journal of Environment & Ecology
Manuscript Number:	Ms_AJEE_99215
Title of the Manuscript:	BIODIVERSITY AND CLIMATE CHANGE IN MEXICO
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. (Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>Yes</p> <p>It is too broad, need to add subheading.</p> <p>Yes, but add few sentences on the basis of subheading.</p> <p>Yes</p> <p>Yes</p> <p>I have provided some references to add</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	Yes	
<p>Optional/General comments</p>	<p>Please add something like this to explain country's problem: Mexico is a country that is incredibly rich in biodiversity and natural resources. It is home to over 200,000 species of plants and animals, many of which are found nowhere else on Earth. However, the country is also facing significant challenges when it comes to preserving its natural environment in the face of climate change. One of the most pressing issues is the loss of habitats due to deforestation and land-use change. Forests in Mexico are being cut down at an alarming rate, primarily due to the expansion of agriculture and urbanization. This destruction not only impacts the species that call these forests home but also contributes to climate change by releasing carbon dioxide into the atmosphere. Another issue facing Mexico is the impact of climate change on its marine ecosystems. Rising ocean temperatures, sea level rise, and ocean acidification are all putting tremendous pressure on the country's coastal communities and the diverse marine life that lives there.
