If you have suggestion of additional references, please mention in the review form.</b></p> <p><b>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</b></p>	<p>I sincerely thank you for giving me the opportunity to review this manuscript entitled "Assessing Eating Habits, Physical Activity, and Nutritional Knowledge Among Female Adolescents in Saudi Arabia" I hope this manuscript helps to understand the contemporary public problem, particularly eating habits and nutrition-related knowledge of female adolescents. The manuscript is scientifically sound with a suitable title. However, I have some minor comments that should be addressed by the authors of this manuscript.</p> <p><b>Abstract</b></p> <p>The abstract section needs to be separated into different sections i.e. introduction, objective, methods, and result and conclusion</p> <p><b>Methods</b></p> <p>You said that "A self-administered dietary questionnaire, originally developed for adolescent students in Italy (35), was used for this cross-sectional study. This questionnaire was previously constructed and tested for reliability" However I recommend checking the compatibility of the questionnaire before the actual data will be collected. The content validity and internal consistency and reliability of the questionnaires should be checked using Cronbach's Alpha before utilizing the questionnaires. If so please report the findings .....if it was missed mention your reasons</p>	
<p><b>Minor</b> REVISION comments</p> <p>1. <b>Is language/English quality of the article suitable for scholarly communications?</b></p>	Needs minor revision to improve the language quality of the manuscript	
<b>Optional/General</b> comments	In General, this manuscript needs revision, I have some concerns about the overall readability of the manuscript. Thus I will urge the authors of this manuscript to revise the text meticulously to fix the grammatical and typing errors and improve the overall readability of the text.
