

Editor's Comment:

Therefore, the authors need to make some modifications before the final decision:

- Some sentences doesn't have an end point, please correct.
- Spell out the meaning of the acronym HIV before it appears for the first time.
- Delete the initials of the patient's name.
- Replace Toxo with toxoplasmosis.
- In the case report, correct the abbreviation CP that appears as PC in the following paragraph.
- Figure 1 should have an explanatory caption and the findings described should be pointed out in the figure.
- PB: cm13 (correct to 13cm).
- Figure 2 should have an explanatory caption.
- The manuscript should have its formatting revised, there are different fonts in the text, and this includes references that must follow a single citation pattern.
- After reference 3 appears written 'Discussion' (please, correct).
