PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The manuscript is an original research: Diagnostic Use of Serum Ferritin as a Predictor of Hospital Outcome at Admission in Patients with Infective Endocarditis. I'm very glad to review the paper because it is a topic of interest to the researchers in the related areas, however, there exist some short comings as detailed in the follows : 1.The inclusion criteria was unclear. 2.How the study subjects were grouped was not clearly described. 3.There are problems or deficiencies in statistical index description. 4.The reference documentation is too old, please quote from nearly 3-5 years.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
