

**Editor's Comment:**

After analyzing the article of the changes made according to the suggestions of the reviewers, the authors could still improve:

- The title is very long. Suggestion: "Entry Requirements as a Predictor of Academic Performance at Nursing and Midwifery Training College in Ghana - A Case Study";
- Abstracts should not exceed 250 words. This one has close to 700! I suggest that the summary be shortened in each of its sections (in particular: Methodology; Findings; Conclusions) and that recommendations be withdrawn.

By making these improvements the article can be published.
