

**Editor's Comment:**

The comment for this manuscript as attachment file.

The final decision is "reject".

The main reason are as follow:

1. The problem is not clear.
2. The methodology and data collected are not clear too.
3. The key word "value chain analysis" in this topic, but I ccan't find any empirical study result from the survey data.
4. The writting style is poor in this manuscript.
