

## Review Form 1.7

Journal Name:	<a href="#">Asian Journal of Agricultural Extension, Economics &amp; Sociology</a>
Manuscript Number:	Ms_AJAEES_98399
Title of the Manuscript:	Factors Affecting the Adoption of Blackgram (LBG-752) Variety in Krishna District of Andhra Pradesh
Type of the Article	

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

<https://www.journalajaees.com/index.php/AJAEES/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Compulsory</b> REVISION comments</p> <p>1. <b>Is the manuscript important for scientific community?</b> (Please write few sentences on this manuscript)</p> <p>2. <b>Is the title of the article suitable?</b> (If not please suggest an alternative title)</p> <p>3. <b>Is the abstract of the article comprehensive?</b></p> <p>4. <b>Are subsections and structure of the manuscript appropriate?</b></p> <p>5. <b>Do you think the manuscript is scientifically correct?</b></p> <p>6. <b>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b> <b>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</b></p>	<p>Yes, It can give directions on what attributes of the technologies and producers' characteristics shall be considered during technology generation and demonstration; and Socioeconomic situations to be considered. But It need some modification.</p> <p>No. The title must be specific to the variety understudy "Factors Affecting the Adoption of Blackgram(LBG-752) X-Variety in Krishna District of Andhra Pradesh</p> <p>Yes. The abstract is written well.</p> <p>There must be brief description of the study area.</p> <p>Yes, but not strong. It needs sufficient sample size to run likelihood estimation models like logit (at least 10X plus of the number of exogenous variables) and ways of specifying explanatory variables. The introduction part needs to be cited (must be justified by references). *X<sub>3</sub> = Education status of the farmer, is a factor variable that should not be considered as a count or continuous variable. Here you considered it as a continuous variable which is technically BIG wrong. So, the model should be re-run.</p>	
<p><b>Minor</b> REVISION comments</p> <p>1. <b>Is language/English quality of the article suitable for scholarly communications?</b></p>	<p>The tenses should be revised. For instance: "The study "Factors Affecting the adoption of Blackgram variety LBG-752 in Krishna district of Andhra Pradesh" with the following objectives" shall be written like "This study was initiated with the following specific objectives". About which variety of the crop are you studying? Is it general or some specified improved variety? You better specify the specific variety you are interested in and talking about.</p>	
<p><b>Optional/General</b> comments</p>	<p>The problem is not stated well. Why are you interested in studying this adoption determinants? Is it only because it is grown there widely? Is it due to the introduction of NEW variety of the crop in the area? Is there any resistance to the new technology from producers' side? Etc.</p>	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Are there ethical issues in this manuscript?</b></p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
