SDI EDITORIAL COMMENTS FORM

EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
the phrase: .....metabolic disorders, pre-eclampsia during pregnancy, aortic coarctation, kidney disease, and other congenital anomalies are common secondary causes of hypertension. Metabolic disorders are cardiovascular risk factors, not a cause of secondary hypertension. And "other congenital anomalies" - refers to what? Things about secondary arterial hypertension are very well established. The section intitled "**Anti-hypertensive drugs**." does not speak about the classes of antihypertensive medication.... The Discussion section is missing.	1. **The correction on the highlighted comment done.** 2. **Antihypertensive medication done sir.** **Thanks for your time.**
