

**Review Form 1.7**

Journal Name:	Asian Research Journal of Mathematics
Manuscript Number:	Ms_ARJOM_108243
Title of the Manuscript:	Fixed Point Results for Generalized Non-Linear Operators with Convergence Analysis
Type of the Article	Original Research

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Compulsory</b> REVISION comments</p> <p>1. <b>Is the manuscript important for scientific community?</b> (Please write few sentences on this manuscript)</p> <p>2. <b>Is the title of the article suitable?</b> (If not please suggest an alternative title)</p> <p>3. <b>Is the abstract of the article comprehensive?</b></p> <p>4. <b>Are subsections and structure of the manuscript appropriate?</b> Yes.</p> <p>5. <b>Do you think the manuscript is scientifically correct?</b> At great chance it is correct.</p> <p>6. <b>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b></p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Not really.</p> <p>Yes.</p> <p>Yes.</p> <p>Yes.</p> <p>Yes.</p> <p>Yes.</p>	
<p><b>Minor</b> REVISION comments</p> <p>1. <b>Is language/English quality of the article suitable for scholarly communications?</b></p>	<p>It needs to polish.</p>	
<p><b>Optional/General</b> comments</p>	<p>I strongly suggest the author to read it carefully and detects all possible typos and grammar errors. For example, the inequality in the third line on page 5 missed parenthesis . The “since” and “so ” appeared in the 1st line on page 4 is wrong. Also, equation (1.2) missed another half parentheses. Besides, (1.1)-(1.6) lack basic explanations for each quantity in each expression since I think a good paper is convenient to read . For instance, what is the mapping “I” in each equation in (1.1)-(1.6). Is it nonexpansive or expansive or contractive mappings? Furthermore, it would not be safe to acclaimed that “the iterative scheme (1.6) has higher rate of convergence than the J-iteration process” just by one particular numerical example. It lacks theoretical analysis on the convergence speed and complexity.</p>
