

Review Form 1.7

Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_107949
Title of the Manuscript:	Millets: Climate change and nutritional security
Type of the Article	

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<ol style="list-style-type: none"> 1. Yes, the manuscript is important for the scientific community as it addresses significant issues related to food security, malnutrition, climate change adaptation, and the cultivation of millets in India. It provides valuable insights into the role of millets as "nutricereals" and their potential in mitigating the adverse impacts of climate change on agriculture. The manuscript also highlights the nutritional benefits of millets and their suitability for addressing health challenges like diabetes and obesity. Moreover, it underscores the need for policy interventions and market linkages to promote millet cultivation and improve food security. Overall, the manuscript offers valuable information and perspectives that can contribute to ongoing research and discussions in the field of agriculture, nutrition, and climate resilience. 2. The title of the article, "Millets: Climate change and nutritional security," is suitable as it accurately reflects the main focus and content of the manuscript. However, if you're looking for an alternative title, you might consider something like "Harnessing Millets for Climate Resilience and Nutritional Security in India" to provide a slightly more descriptive and engaging title. 3. Yes, the abstract of the article is comprehensive. It provides a clear overview of the key points discussed in the manuscript, including the importance of millets as "nutricereals," the challenges posed by climate change to Indian agriculture, and the need for solutions to ensure food security, income security, and nutritional security. 4. The subsections and structure of the manuscript appear to be appropriate. The manuscript is organized logically, with clear subsections that help guide the reader through the content. It begins with an introduction that sets the stage for the discussion, followed by sections that delve into topics such as millet production, climate resilience, challenges, and a conclusion. This structure allows for a systematic presentation of information and facilitates understanding. 5. The manuscript discusses relevant scientific topics related to millet production, climate resilience, nutritional content, and their potential role in addressing food security and nutrition challenges. 6. Yes. 	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> 1. Is language/English quality of the article suitable for scholarly communications? 	<p>The language and English quality of the article appear to be suitable for scholarly communications. The text is generally clear, well-structured, and free from major grammatical errors.</p>	
<p>Optional/General comments</p>
