(If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1. Yes it is</p> <p>2. Yes but there are some words can replace "Retroaction" such as Response or Impact or Effect</p> <p>3. Yes</p> <p>4. Yes, however, author should concentrate more section M and M, this section is important for others researchers who would like to repeat or do the research same as this study</p> <p>5. Yes 80% good</p> <p>6. Yes, however, discussion needs more references and comparison among other previously studies for making a stronger results of this study</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>More than 50 % is okay</p>	
<p>Optional/General comments</p>	<p>Give more detail M and M Give more detail in data collection, how to do it? Revise and edit following by grammar correction. Must add small letter after number in table if parameters showed significant different because it easy for readers. This manuscript has too short of discussion so author must give more discussion by previous studies; there are many studies about sesame.</p>
