

Editor's Comment:

The manuscript cannot be accepted for publication in the Advances in Research. Both reviewers are quite critical of the manuscript and provided several important substantive requirements to the authors. Unfortunately, none of them were raised by the authors and no correction was introduced to the text. The authors also did not provide any responses to the points raised by the reviewers. The word "okay" definitely is not enough. Thus, due to the critical reviews, no response from the authors, and almost no correction of the text, the manuscript must be rejected.

My decision is: Reject.
