

Review Form 1.7

Journal Name:	Asian Journal of Medical Principles and Clinical Practice
Manuscript Number:	Ms_AJMPCP_107276
Title of the Manuscript:	IMMUNOHISTOCHEMICAL EXPRESSION PATTERN OF BRAC 1 AND PROGESTERONE RECEPTORS AMONG FEMALE BREAST CANCER PATIENT IN BAYELSA STATE.
Type of the Article	Original Research Article

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> Is the manuscript important for scientific community? (Please write few sentences on this manuscript) Is the title of the article suitable? (If not please suggest an alternative title) Is the abstract of the article comprehensive? Are subsections and structure of the manuscript appropriate? Do you think the manuscript is scientifically correct? Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Yes. manuscript is important for scientific community</p> <p>Yes. Title is suitable</p> <p>Yes. abstract is comprehensive</p> <p>Yes, subsections and structure are of the manuscript appropriate</p> <p>the manuscript is scientifically corrected.</p> <p>the references are sufficient</p> <p>Author mentioned herewith Luminal A was found to be the most common molecular subtype, and Her2 was shown to be the least common. Patients with breast cancer in Bayelsa state most frequently had an Idiopathic Ductal Carcinoma (IDC). The expression of the progesterone receptor (PR) and the grade of the tumour did not substantially correlate. However, there was a strong association between the existence of a BRCA1 mutation and PR expression. These results highlight the importance of considering PR expression and BRCA1 mutation status when deciding how to diagnose and treat breast cancer.</p> <p>Author also mentioned herewith fully grasp the clinical implications of these findings and look into targeted therapies for breast cancers associated with BRCA1, more research is necessary.</p> <p>The result and discussion is written in proper way. Experimental details are given in sufficient detail. The writing part of manuscript is well and supported by sound photographs. I will recommend the manuscript for possible publication in the journal. I must accept.</p>	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> Is language/English quality of the article suitable for scholarly communications? 	<p>yes</p>	
<p>Optional/General comments</p>
