If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>YES</p> <p>Enhanced Robust Estimators for Estimating Population Means When Confronted with Non-Response and Measurement Error</p> <p>YES</p> <p>YES</p> <p>YES</p> <p>YES</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>YES</p>	
<p>Optional/General comments</p>	<p>The manuscript is a valuable contribution to the field of statistics and survey methodology. It tackles the important issue of estimating population means in the presence of non-response and measurement error using enhanced robust estimators. The title effectively conveys the focus of the research, and the abstract provides a comprehensive overview of the study. The manuscript's structure and subsections are well-organized, making it easy to follow the research methodology. Scientifically, the manuscript appears to be sound, and the references are both sufficient and up-to-date.</p> <p>However, minor revisions are needed to improve the language and English quality in the manuscript. Therefore, the study holds great potential for the scientific community and should be considered for publication with the suggested improvements.</p>
