The manuscript is important.</p> <p>2. The title is suitable.</p> <p>3. The abstract is comprehensive.</p> <p>4. The subsections are appropriate.</p> <p>5. The manuscript is scientifically correct.</p> <p>6. The references are sufficient.</p> <p>7. The following are to be considered:</p> <ul style="list-style-type: none"> - Editing is required. - The abbreviation AI once introduced, it should be used later on in all instances, not to keep switching between the two. - The phrase "employees of a society or organization." seems misplaced at the end of the abstract. - Also there is a misuse of the full stop in "helps keep things simple." in the abstract. - The term 'Keywords' should be followed by a colon rather than a dash and the keywords should not end up with a full stop. - What does BPA mean in the abstract? - Why the Introduction section is not numbered? And why the subsections in upper case that come after are numbered as I, II,? - The "In all likelihood, all this is is a piece of" reflects a weakness in style. - Contractions as in "That's right; it's possible we're not dealing" are not acceptable in academic writing. - Why section A on page 2 is not italicized like B, C...etc.? - A sentence on page 3 reads "Artificial intelligence and the Internet of Things are both driving innovation, which is increasing the rate of change." where full words are used. The researcher keeps on using the full words and the abbreviations interchangeably. The same goes with "robotic process automation" and other examples throughout the paper. - The last paragraph on page 3 starts with"change, but if you use the right instrument, the impact might be greatly magnified. c" which is incomplete. - 	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Editing is highly recommended to have a publishable paper.</p>	
<p>Optional/General comments</p>
