Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Understanding and Disciplines is the idea of information, which can be thought of as a person's knowledge of a certain sector or field. Learning in this area is well-known because it involves training in one's own thoughts. Although both teachers and institutions play a big role in bringing students out of the darkness by giving them the best learning opportunities, moral growth is also a key part of this process.</p> <p>That's why education is seen as a process that is always changing and growing, and the most important part of any educational program is discipline. It's important for new academic fields like curriculum development, the technology of education, and educational sociology to exist, according to many experts in the field. Individuals are in charge of carrying out these educational processes, so it is necessary to spend money on their preparation.</p> <p>The article's title is descriptive and appropriate.</p> <p>The article's abstract covers all of the information in the full article.</p> <p>The manuscript has the appropriate amount of sections, as well as a clear organizational structure.</p> <p>The manuscript adheres to the accepted standards of the scientific community.</p> <p>The references are not adequate nor up to date; they should have been made within the last five years.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>The article's level of English language proficiency is adequate for use in scholarly communications.</p>	
<p>Optional/General comments</p>
