

Editor's Comment:

There is too much information in the abstract of the study. Abstracts should contain only the purpose, methodology, data, and results of the study. The references in the text are not included in the references section at the end of the document. The number of references is also very limited. In this study, the methodology has been unnecessarily extended. There should have been a greater number of relevant references used. Unfortunately, the referees did not take note of the corrections I mentioned above. If the necessary corrections are not made, the work will not be ready for publication.

Editor's Details:

Dr. Arzu Alvan Bozdereli
Associate Professor, Cyprus Science University, Cyprus.
