<p><b>Optional/General</b> comments</p>	<p><b>The author should reduce the introduction of the paper. The authors have applied linear regression for studying the trend in the population. The results of the regression should be reported in a separate table with R<sup>2</sup> values. The authors should avoid the writing of equations in the graph. The authors should remove the species cat and dogs from the study as the population of these species is very less as compared to the other species. The conclusion should be small and informative. In the present case the size of conclusion should be reduced. Moreover in the present study the authors have not discussed the results by citing appropriate references. That is discussion of the results is missing in this paper.</b></p>
