

Review Form 1.7

Journal Name:	Journal of Advances in Mathematics and Computer Science
Manuscript Number:	Ms_JAMCS_106860
Title of the Manuscript:	Study on Determining the Blood Glucose Concentration During an Intravenous Injection Using Volterra Integral Equations
Type of the Article	Original Research Article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> Is the manuscript important for scientific community? (Please write few sentences on this manuscript) Is the title of the article suitable? (If not please suggest an alternative title) Is the abstract of the article comprehensive? Are subsections and structure of the manuscript appropriate? Do you think the manuscript is scientifically correct? Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<ul style="list-style-type: none"> It would be good to fully clarify the precise reason and significance of this novel technique, even though the introduction notes that Volterra integral equations have attracted the attention of numerous academics and that many methods have been developed. What makes the introduction of a new technique important? What special benefits does it provide over current practices? The introduction would be strengthened by providing a clearer motivation. The introduction includes clear discussions about the background of the study with supporting RRL. However, the reviewer suggests to include and discuss your objective and the statement of the problem in your introduction since it will be the basis of your results and discussion The paper includes enough figures related to the discussions. However, some of the figures doesn't have specified number it is hard for the reader to follow some part of the discussion. Some of the tables were referenced and linked properly however I suggest including table number on each. Please format the figure and table in bold style so it can easily be identified. Include proof that your data is study is efficient and accurate. 	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> Is language/English quality of the article suitable for scholarly communications? 		
<p>Optional/General comments</p>		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
