<p><b>Compulsory</b> REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>[1] The manuscript is relevant to the scientific community, in terms of the population's greater life expectancy in general.</p> <p>[2] The title is brief, for those new to the field, I suggest "evaluation of influence" instead of "impact" and at the end add "a review study".</p> <p>[3] The Abstract is more of an introduction, I suggest stating the objective of the study more clearly, the methodology used and the main results achieved by the review and conclusion.</p> <p>[4] The parts of the manuscript are in line with the results, I suggest inserting a table or chart with the main results to make it easier to read.</p> <p>[5] In general, the parts of the manuscript are in accordance with scientific rigor, and other studies will be able to use its results for clinical practice.</p> <p>[6] The bibliographical references are in line with the proposal for a literature review.</p>	
<p><b>Minor</b> REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>The technical language of the manuscript is clear, but I suggest inserting tables or tables for summarization to make the text clearer.</p>	
<p><b>Optional/General</b> comments</p>	<p>A review with the intention of highlighting all the problems that arise with the use of anesthetic drugs in elderly patients is a topic of great relevance in healthcare, particularly in anesthesiology and geriatrics. As the population ages in many parts of the world, surgery and anesthesia in elderly patients are becoming increasingly common. It is essential to understand and address the specific challenges and risks associated with this population.</p>
