

Review Form 1.7

Journal Name:	Asian Journal of Research and Reports in Ophthalmology
Manuscript Number:	Ms_AJRROP_108825
Title of the Manuscript:	Preservation of Demodex Folliculorum in the Eyelash Follicles of Cadavers
Type of the Article	Short Research Article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1. Yes. This manuscript is important for scientific community especially those that handle cadavers in mortuaries, cadaveric labs.</p> <p>2. Preservation of Demodex Follicularum in the eyelash follicles of cadavers is not the appropriate title. It can be persistence of Demodex follicularum mites in the eyelash follicles of human cadavers</p> <p>3. Abstract is comprehensive for the work undertaken</p> <p>4. subsections and structure – a mention should be made on their presence in animals and a mention should be made on their presence and status of immunity of the dead in the review of literature. A comment should be made on the description of A-D cadavers medical history and its relevance for DF in discussion. DF and DB differences in the first para of introduction especially last sentence to be reframed for a clear understanding of their location. The DF mites skeletons only were detected in this study not live ones. There should be emphasis on this aspect and be correlated and concluded with the role of preserving or embalming fluids reducing their infestation.</p> <p>5. Scientifically correct</p> <p>6. references are sufficient.</p> <p>7. the pictures are to be labelled appropriately Fig.1.c B: placing the sample ----- incomplete sentence. Fig 2. To be numbers a-c with description and labeling</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	Yes suitable	
<p>Optional/General comments</p>	Though it is a small piece of work it is a good communication to the medical field. It should form a basis for undertaking similar studies in all cases of end stage ICU cases for screening for live DF/DB, and in patient and cadaver handlers.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
