JournalName:	Journalof Materials Science ResearchandReviews
ManuscriptNumber:	Ms_JMSRR_108267
Title ofthe Manuscript:	INHIBITIONOFALUMINIUMCORROSION INKOH SOLUTIONUSING EXTRACTOFGRAPLEAF ASINHIBITOR
Type ofthe Article	

ReviewForm1.7

PART1:ReviewComments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write a few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Yes</p> <p>Yes</p> <p>Yes</p> <p>Yes</p> <p>Yes</p> <p>Yes</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the articles suitable for scholarly communications?</p>	<p>Yes</p>	
<p>Optional/General comments</p>	<p>It is an interesting manuscript about natural antioxidant agents from plant extracts applied on inorganic material as Aluminium. It merits to be published; however please consider the following comments and suggestions: i) In the Abstract it is suggested to add an extra phrase with information related with the methodology used to quantify the oxidation event; to then mention the performance of the developed assays. ii) About Results and Tables; Please check legends and Figure captions. There are missing units and important details to understand the Tables/Figures. iii) Please check Figures resolutions, they are blurry; and someone missing of separated in different parts (Fig. 2). iv) Moreover, more details about conditions of the assays, and times of different measurements. Check concentrations, temperature, and other variables non mentioned. It is a general comment. v) In this context discuss about minimal times required for weight losses and how the application of the antioxidant formulation affected these variations. vi) There is missing information about natural extract and antioxidant properties applied on hard material or solid inorganic materials. This is part of the innovative insight that the Research work is trying to show and discuss. Please evaluate that and add references related if it is the case. viii) Revise materials and methods section taking into account the previous observations related with missing details and descriptions of assays. ix) A general comment about the redaction, please consider to add introductory phrases in the section developed in order to introduce the work accomplished, even if the procedures were mentioned in materials and method. These additions support the understanding of the ongoing Research work shown. ix) Another general comment. There is missing development of redaction describing and discussing results. These subsections are too short.</p>
