

**Editor's Comment:**

The reviewed manuscript (2023/ARRB/107851) entitled, "ANTIMALARIAL EFFECTS OF ETHANOLIC LEAF EXTRACTS OF *Azadirachta indica* AND *Ocimum gratissimum*, AND THEIR HISTOLOGIC EFFECTS ON SOME ORGANS (LIVER, KIDNEY, AND HEART) OF *Plasmodium berghei* INFECTED ALBINO MICE" to me for taking a final decision. It is indeed a wonderful piece of research work with enovative findings. I have gone through the paper and found that the authors have followed the majority of the scholastic comments/suggestions raised by the reviewers as well as substantially improved their manuscript but there are still some minor mistakes/errors in wordings and languages as well as formatting/arranging of Tables, figures/plates that are needed to be corrected before final printing. Therefore, I recommend the manuscript for publication in Annual Research & Review in Biology with minor revisions. Hope, you will agree with my decision as well as take needful action towards its acceptance and publication as well.
