Journal Name:	<b>Journal of Advances in Medical and Pharmaceutical Sciences</b>
Manuscript Number:	<b>Ms_JAMPS_108714</b>
Title of the Manuscript:	<b>Hepatoprotective Effects of Ethanol Extract of Allium sativum (Garlic) on Diabetes Induced Male Wistar Albino Rats.</b>
Type of the Article	<b>Original Research Article</b>

**Review Form 1.7**

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Compulsory</b> REVISION comments</p> <ol style="list-style-type: none"> <li><b>Is the manuscript important for scientific community?</b> (Please write few sentences on this manuscript)</li> <li><b>Is the title of the article suitable?</b> (If not please suggest an alternative title)</li> <li><b>Is the abstract of the article comprehensive?</b></li> <li><b>Are subsections and structure of the manuscript appropriate?</b></li> <li><b>Do you think the manuscript is scientifically correct?</b></li> <li><b>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b></li> </ol> <p><b>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</b></p>	<p>The present study was designed to evaluate the Hepatoprotective Effects of Ethanol Extract of <i>Allium sativum</i> (Garlic) on Diabetes Induced Male Wistar Albino Rats. I have the following comments:</p> <ol style="list-style-type: none"> <li>Abstract should be brief and concise. It must be rewrite and clear. What were your most important reasons for carrying out this investigation?</li> <li>Quite a few literatures were involved. There is need to include new reference data and articles that deal with the goal of this manuscript.</li> <li>List of chemicals and solvents used were not given.</li> <li>Treatment protocol was confused. It must be rewrite and clear. How the dose of <i>Allium sativum</i> (garlic) was selected? How author know that animals are diabetic without any measurement of blood glucose and insulin?</li> <li>Please re-edit the result section and delete the duplicated words in this section. How do you present the results , as mean and SE or mean and SD? Statistical significance was not given in figure 1 and 2.</li> <li>I recommend for addition study on histopathological changes must be included to improve the manuscript quality.</li> <li>Discussion and conclusion are very poor, with not enough explanation. Please improve thoroughly this part of the manuscript. Conclusion was based on biochemistry only insufficient. There were no histopathology-no valid conclusions.</li> <li>The bibliographical support is old and deficient especially in comparison with the results of worldwide investigations results. References need update.</li> </ol> <p>Overall manuscript needs major revision before its publication.</p>	
<p><b>Minor</b> REVISION comments</p> <ol style="list-style-type: none"> <li><b>Is language/English quality of the article suitable for scholarly communications?</b></li> </ol>		
<p><b>Optional/General</b> comments</p>		

**PART 2:**
