

Editor's Comment:

The reviewed manuscript (2023/ARRB/108641) entitled, "Ethylacetate Flavonoid Bio-compounds of Honey with Mitigating Anti-hyperlipidemic and Antioxidant Properties in Carbohydrate and Lipid Enriched Diets – Obese Rats" to me for final evaluation as well as taking a final decision. Indeed, it is a nice piece of research work having interesting findings. I have gone through the paper and found that the authors have followed the majority of the scholastic comments/suggestions raised by the reviewers as well as substantially improved their manuscript but there are still some minor mistakes/errors in wordings and languages that need to be corrected. Therefore, I recommend the manuscript for publication in Annual Research & Review in Biology with minor revisions.
